Endermolift™  
BY ENDERMOLOGIE®

100% NATURAL

The anti-aging  
REDENSIFICATION

THE SKIN IS A LIVING ORGAN WHOSE CELLULAR ACTIVITY MAINTAINS ITS FIRMNESS, SOFTNESS AND HEALTHY GLOW. AFTER THE AGE OF 25, YOUTH CELLS (FIBROBLASTS) REDUCE

THEIR COLLAGEN AND ELASTIN PRODUCTION.

THE SKIN LOSES ITS SUBSTANCE AND THE SIGNS OF AGING APPEAR, INCLUDING WRINKLES, SAGGING CONTOURS AND A DULL COMPLEXION.

## Endermolift™

This exclusive anti-aging technique redensifies skin in depth to erase the signs of aging.

LPG Lifts deliver micro-beats to the skin's surface to stimulate youth cells in-depth, restarting their natural production of collagen and elastin.
